**Selective Admission Practices?
Comparing the Milwaukee Public Schools and
the Milwaukee Parental Choice Program**

Howard L. Fuller, Ph.D., and George A. Mitchell

**Prepared for Presentation to “Can Choice Transform America’s Schools?”
Education Writers Association
The Poynter Institute, St. Petersburg, Florida
January 28-29, 2000**

Summary

Advocates of tax-supported private school vouchers say they will expand educational opportunity. Opponents say achieving that goal is at odds with selective private school admission practices. We compared allowable admission practices in the Milwaukee Public Schools (MPS) and the Milwaukee Parental Choice Program (MPCP).¹ We found that:

- MPS schools use a wide range of selective criteria to screen students.
- Private schools may not use any screening criteria for MPCP-eligible students.

Background

The MPCP is the nation's oldest program of tax-supported, K-12 school choice in private schools. Enacted in 1990, it allowed one per cent of MPS enrollment (then about 1,000 students) to attend non-sectarian private schools at state expense. Now, up to 15 per cent of MPS enrollment (about 15,800 students) may attend non-sectarian or sectarian private schools. This year, 8,104 students are using the MPCP at 91 different private schools.²

MPCP eligibility and allowable screening. Students eligible for the MPCP are Milwaukee residents from families with income at or below 175% of the federal poverty level. Private schools receive no information from eligible students in such areas as academic ability, special education needs, or prior disciplinary action (see Attachment I, the MPCP student application). On a space available basis, private schools in the MPCP must accept any eligible applicant.³

Claims of voucher opponents. The MPCP prohibition on selective admission criteria is at odds with claims made by voucher opponents in attacking it and similar programs. For example:

- The National Education Association (NEA), the nation's largest teachers union, says: "Parental choice is a misnomer. Private school admissions offices make the choice of which students to admit or reject. Private schools retain the right to reject or accept any student, regardless of whether the student holds a voucher. By definition, private schools are selective, using a variety of criteria to weed out applicants."⁴
- The American Federation of Teachers (AFT), the second largest teachers union, says: "Private schools normally screen applicants on a number of grounds, including, but not limited, to: prior academic achievement; standardized test scores; prior disciplinary record; written application; interviews with applicants and their parents; and parents' willingness to volunteer at the school (often required)..."⁵
- The People for the American Way (PFAW) and National Association for the Advancement of Colored People (NAACP) allege that MPCP schools use admission practices prohibited by Wisconsin law.⁶
- Wisconsin State Rep. Christine Sinicki says that "choice promoters talk about choice leveling the playing field, but choice schools are still picking and choosing what children they want." Expressing a widely held, frequently reported, and rarely challenged view, she said: "Public schools cannot turn away anyone who comes to their door."⁷
- Tammy Johnson, of Wisconsin Citizen Action, said during a 1999 "town hall" meeting on race relations: "[W]e are leaving children behind in this rush to so-called [education]

reform...whether it is charter or voucher...[Parents] in public education [are] concerned about...disabled kids...kids with learning disabilities...kids who have behavioral problems, kids who have been involved in the juvenile criminal justice system. Those kids get left behind [by school vouchers] because...a lot of private schools...don't have to take them, so that leaves it behind for public education to deal with those children."⁸

This report

We compare allowable admission practices at MPS schools with those for MPCP-eligible students.⁹ We express no opinion on the appropriateness of MPS or MPCP admission practices. Our objective is to describe them, given claims by voucher opponents.

We identify three misperceptions advanced by voucher opponents:

- Misperception One — private schools apply to MPCP students the same admission criteria they use for other students.
- Misperception Two — all public schools accept “all students.”
- Misperception Three — all public schools do not use selective criteria.

In fact, MPS schools often use selection criteria typically associated with private schools. For example, as we describe, this year fully 37% of MPS high school students attend schools with a range of highly selective admission criteria. Meanwhile, private schools are barred from using such criteria in reviewing MPCP applications.

Thus, the situation is the mirror opposite of what voucher opponents claim. This reflects both state law and local policy decisions. For example, while the law entitles children to a tax-supported public education, the school they attend often is influenced by restrictions set by local officials. In Milwaukee, for example, the school board lets individual schools use selection criteria that resemble what the AFT claims are common in private schools, including, in the AFT's words from above: "...prior academic achievement; standardized test scores; prior disciplinary record; written application; interviews with applicants and their parents...."

In contrast, state law prohibits private schools from using any criteria for MPCP-eligible students. Private schools are required to use what amounts to an open admission policy for MPCP-eligible students.

MPS Admission Criteria

The MPS school directory informs parents that they might make an "inappropriate school choice," a phrase notably absent from MPCP statutes or rules.¹⁰ An "inappropriate school choice" is defined as a “school selection that is not an appropriate option [such as when a] student [is] not eligible for [a] program.”

Elementary and middle school selection criteria. Under the heading “Schools/Programs With Eligibility Requirements,” MPS lists 21 schools with “eligibility requirements...[C]ontact your child’s current school or the schools listed...for additional details about eligibility requirements.”¹¹ Schools include those with programs for “the Academically Talented” and “Gifted and Talented” students. Attachments II and III are to be filled out for students seeking admission to a Program for the Academically Talented or a Gifted and Talented school. Table 1 summarizes information required on these forms.

Private schools may use none of the criteria in Table 1 to screen MPCP-eligible students.

Table 1. Information required of applicants to MPS Gifted and Talented schools and Program for the Academically Talented.

Category	Required Information
1. General	<ul style="list-style-type: none"> • M-Teamed? Yes or No.¹² • Race or Ethnicity. • Free/Reduced Lunch Eligibility.
2. Achievement	<ul style="list-style-type: none"> • Name(s) of test(s); date(s) given. • Areas tested (reading, math, other). • Percentile rank.
3. Reading	<ul style="list-style-type: none"> • Identify reading series being used. • Specify "readiness" level.
4. "Student Potential"	<p>The student's "POTENTIAL" is ranked in these areas:</p> <ul style="list-style-type: none"> • "General intellectual ability;" • "Specific academic ability;" • "Creative or productive thinking ability;" • "Leadership ability;" and • "Visual and performing arts ability."
5. "Student Performance"	<p>From "rarely" to "almost always," the student:</p> <ul style="list-style-type: none"> • Uses "an unusually advanced vocabulary;" • Has "a large storehouse of information;" • Has "unusual insight into values;" • Handles "responsibility well; can be 'counted on';" and • Is ranked on 16 other criteria (see Attachments II-III).
6. "Student Potential"	<p>"...[W]rite one sentence that best describes this student's:</p> <ul style="list-style-type: none"> • "academic potential;" • "social/emotional potential;" • "visual or performing arts potential;" and • "leadership potential."
7. "Student Performance"	<p>"...[A]ttach...the student's <u>most current</u> report card!"</p>
8. Other	<p>Letters of recommendation; other comments.</p>

Montessori and language immersion schools. MPS Montessori schools serve students from the age of three through eighth grade. According to MPS, no child over 4 years old may enter these schools if they do not have “[p]revious continuous Montessori experience...” MPS also has language immersion schools for students four years old through fifth grade. After grade one, children must pass a language proficiency test to be admitted.

Such requirements are not allowed for MPCP-eligible students at private schools.

MPS High Schools. Six MPS high schools use selective admission and screening criteria — criteria that private schools *may not use* in reviewing applications of MPCP students. Figure 1 shows that more than one in three MPS high school students are in schools using selective criteria.

Figure 1. MPS high school enrollment, 1999-2000.¹³

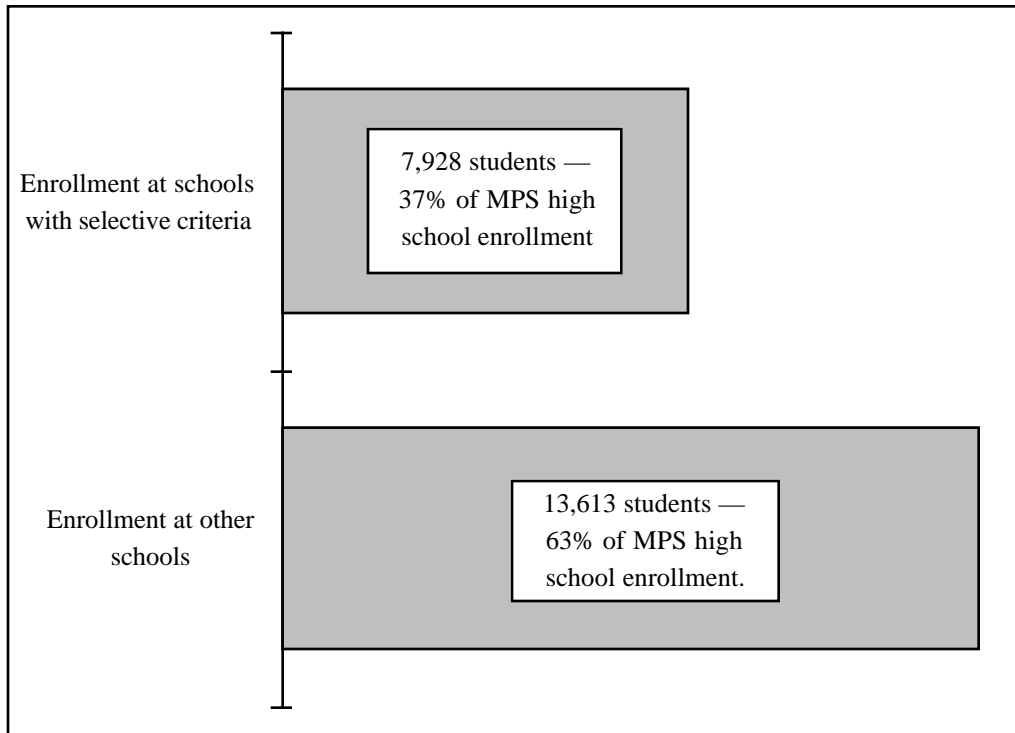

Table 2, following page, summarizes screening criteria used at selective MPS high schools, criteria that again resemble what the AFT claims are common in private schools: "...prior academic achievement; standardized test scores; prior disciplinary record; written application; interviews with applicants and their parents...."

Table 2. 1999-2000 admission requirements at MPS High Schools.¹⁴

School	Admission Requirements
Custer High School	<ul style="list-style-type: none"> • Most recent report card. • Complete a "multiple paragraph essay" at "mandatory orientation" session. • Complete "parent and student questionnaires," with "completeness and neatness [being] essential as it is a portion of the assessment criteria."
Madison University High School	<ul style="list-style-type: none"> • Prior "School Performance, including attendance and achievement." • "Performance Assessment including a required essay and performance task." • "...Recommendations...from two current teachers or counselors." • "...Both students and parents must sign a contract agreement outlining graduation requirements and school discipline policy."
High School of the Arts	<ul style="list-style-type: none"> • "...[A]ttend an audition workshop to acquaint the families with MHS's rigorous academics, artistic standards and audition requirements." • Audition in one or more areas (creative writing, dance, music, theatre, visual art).
Milwaukee Trade & Technical High School	<ul style="list-style-type: none"> • "Interest in vocational, trade, and technology education evidenced by enrollment in a middle school technical educational program and/or an equivalent experience." • "90% attendance" in middle school. • Attend "orientation session...to acquaint families with Tech's expectations, its rigorous curriculum, and its discipline policies." • Answer "four short essay questions...expressing [student's] goals, expectations, and a commitment to the" MTTHS program...." • At the orientation, demonstrate "writing proficiencies and knowledge of the school's program."
Riverside University High School	<ul style="list-style-type: none"> • Attend "orientation session...to acquaint families with Riverside's expectations, its rigorous curriculum, and its discipline policies." • At the orientation, "[s]tudents must write a 200-300 word, multiple paragraph essay, which outlines the student's academic goals and explains how attending Riverside will advance those goals." • "Students must have two signed recommendations from two current eighth grade teachers who are familiar with the student's work and study habits."
Rufus King High School for College Bound	<ul style="list-style-type: none"> • "Each student applying to Rufus King must submit a portfolio. All portfolio criteria listed below must be completed." • "School Performance which include attendance, effort, and achievement..." • "Performance Assessment to include a required essay and a required performance task." • "Evidence to show accomplishments in at least two areas such as special talents, co-curricular activities, community involvement, or leadership ability."

Other Public School Admission Criteria

MPS is not alone among Wisconsin public schools in using admission criteria that may not be used by private schools regarding MPCP-eligible students.

Interdistrict transfer students. Under a state law known as Chapter 220, MPS minority students may transfer to suburban districts and white suburban students may transfer to MPS. Public schools in the Chapter 220 program specify how many spaces are available for such transfers. However, unlike in the MPCP, the Chapter 220 contract between MPS and suburban public schools says they "may refuse to accept an applicant for transfer who":

- Had been expelled or "could have been expelled;"
- Had poor attendance;
- Requires bilingual education;
- At the pre-school or kindergarten level, has not been screened "to identify exceptional education needs;" or
- Has been referred for an exceptional education evaluation that is incomplete.

Such requirements are not allowed for MPCP-eligible students at private schools.

These currently allowable Chapter 220 screening practices are scaled back substantially from the program's earlier years.¹⁵

Public school open enrollment. In 1997, the Legislature amended state law to "allow a pupil to attend a public school in a school district other than the one in which the pupil resides...."¹⁶

The law allows public schools to reject a student's application using a variety of criteria that may not be applied to MPCP-eligible students at private schools.

For example, under "NONRESIDENT SCHOOL DISTRICT ACCEPTANCE CRITERIA," the law says that "[p]ermissible criteria...for accepting and rejecting applications...may include":

- "Whether the pupil has been expelled...by any school district during the current or 2 preceding school years for any of the following reasons or whether a disciplinary proceeding involving the pupil, which is based on any of the following reasons, is pending:
 - "Conveying or causing to be conveyed any threat or false information concerning an attempt or alleged attempt being made or to be made to destroy any school property by means of explosives.
 - "Engaging in conduct while at school or while under supervision of a school authority that endangered the health, safety or property of others.

- "Engaging in conduct while not at school or while not under the supervision of a school authority that endangered the health, safety or property of others at school or under the supervision of a school authority or of any employe of the school district or member of the school board.
- "Possessing a dangerous weapon, as defined in s. 939.22 (10), while at school or while under the supervision of a school authority.
- "Whether the special education program or related services described in the child's individualized education program...are available in the nonresident school district or whether there is space available in the special education program identified in the child's individualized education program, including any class size limits, pupil-teacher ratios or enrollment projections established by the nonresident school board.
- "Whether the child has been screened by his or her resident school board...to determine if there is reasonable cause to believe that the child is a child with exceptional educational needs."

The law also provides that a non-resident school district "...may require that the [non-resident] pupil reapply, no more than once, when the pupil enters middle school, junior high school or high school."

The public school open enrollment law has still other provisions and limitations not found in the MPCP statute. For example:

- "...[T]he resident school board shall provide to the nonresident school board...a copy of any expulsion findings and orders pertaining to the pupil, a copy of records of any pending disciplinary proceeding involving the pupil, a written explanation of the reasons for the expulsion or pending disciplinary proceeding and the length of the term of the expulsion or the possible outcomes of the pending disciplinary proceeding."
- "If the costs [to a transferring pupil's district] of the special education program or services...for a [transferring] child...would impose...an undue financial burden...the child's resident school board may notify the child's parent...that the pupil may not attend the nonresident school district...."

Attachment IV illustrates the records a transferring student must provide so that non-resident districts have information to use in applying the allowable special education and disciplinary screening criteria.

Special Education Students

We previously noted misperceptions advanced by voucher opponents to claim that public schools accept "all students" and private schools use highly selective admission practices. As we have shown, many MPS schools use academic screening criteria, whereas private schools may use none of those criteria in considering MPCP students.

The situation is similar regarding students with "special education needs."¹⁷ Voucher opponents attack private schools in this area by first advancing the misperception that:

- Private schools, in general, admit few special education students.
- Public schools accept all such students.

Voucher opponents then make specific misrepresentations of the MPCP. For example, the AFT says, "...private schools [in the MPCP] do not have to admit any disabled students."¹⁸ Others cite such claims as evidence that hard-to-educate students are shut out of the MPCP (see, for example, Tammy Johnson's comments, pp. 1-2).

We demonstrate at length below that, in Milwaukee, such claims are untrue. *In fact, private schools may exclude no MPCP-eligible student based on special education needs.* We know of no actual example, from voucher opponents or any other source, of an MPCP-eligible student being denied admission to a private school based on special education needs.

Special needs students — MPCP schools

We summarize below information from four different MPCP schools regarding programs for special needs students.

Prince of Peace School/Escuela Principe de Paz.¹⁹ These examples involve *prior MPS students* with special education needs who now attend this K-8 school as part of the MPCP. Principal Donna Schmidt said, "they are examples of students (with special learning needs) who have applied to our school, been accepted and need services that were not previously supplied by our school community."

Example 1. Male, Grade Seven, disability not yet determined: "This [young] man has attended numerous schools (both private and public, including MPS). He has a history of poor attendance, and in fact, was not M-teamed [see note 12] because his attendance was so poor. Our school is located closer to home, and his mother hoped that this would increase his attendance. Attendance continues to be sporadic. Modifications have been made in his curriculum and schedule. Referrals have been made to support services and the M-Team process has been initiated."

Example 2. Male, Grade Eight, learning disabled: "According to his mother, this young man did not like going to school (he was enrolled in MPS). She therefore, decided to enroll him at our school. He has an IEP [Individual Education Plan] that we have been working to implement. Modifications have been made to his curriculum. He also participates in the Computer Assisted Instruction Laboratory [with Federal Title 1 funds] provided by MPS in our building. A bilingual tutor has also been hired [who] works directly with this student and other students who are having difficulty in school because of English being their second language."

Example 3. Male, Grade Five, behavior disorder: "In 2nd grade, this [child] was [placed in a foster] home. He is estimated to have been in 6-8 foster homes. As a student in MPS, he was placed in an alternative school. Following numerous suspensions, he came to our community. At this point, we are working to implement his IEP. Meetings are scheduled to determine how we can best meet his needs."

Schmidt added: "We also have numerous students who experience English as a second language. For many of them, their school experience is their first exposure to a totally English speaking environment. Three tutors have been hired to work with our younger students. [They] not only provide academic support, but further enhance our community by providing these students with the extra attention and care that reinforces their self-esteem."

Messmer High School. Brother Bob Smith, president of this school, provided examples of *former students in MPS or other public schools* now enrolled at Messmer.²⁰

Example 1. A ninth grade male MPCP student who took the placement exam (**not entrance exam**) wrote on his essay: "heep me! I cant reed." Messmer accepted the student and placed him in the third grade reading level.

Example 2. An eleventh grade male enrolled at Messmer after being expelled by MPS for getting into a school fight with another student. The student graduated with a "B" average and now attends a post-secondary institution.

Example 3. A tenth grade male, accused of a weapons violation in MPS, was expelled. The student enrolled in a suburban school district, but never attended because his MPS expulsion was discovered and he was not admitted (see Chapter 220 discussion above).

John Benson, the Wisconsin Superintendent of Public Instruction and a strong MPCP opponent, asked Smith to accept the student. Messmer did. The boy attended for one year. The boy and his family moved to Illinois and recently said that they are moving back to Wisconsin and plan to enroll the boy at Messmer.

Example 4. Messmer has accepted two students with more than 50 absences in the prior school year, and one who had 86 absences (out of about 180 school days) at MPS.

Example 5. Messmer accepted a female student with a medical condition that involves one to two spontaneous seizures a week that are severe enough to require paramedics. Messmer usually does not allow students to attend more than four years. However, the school allowed this student to attend a fifth year so she could graduate.

Example 6. Messmer has enrolled a student with Hodgkins Disease who was hospitalized so much Messmer provided tutors to help the student keep up with school work. Messmer has a female student who is medically defined as a dwarf. She is in lots of pain with spinal problems and has many ongoing medical procedures that interrupt her educational program.

To these examples, Smith added: "Every year Messmer takes kids who have nowhere else to go. Many come from MPS. Some come from the suburbs. Ninety-eight percent are excellent students. Our population of kids who are categorized as special needs [is] increasing. Fifteen to 20 percent of [MPCP] students [at] Messmer are defined with special needs...[W]e have a number of children each year [not counted in above] who have sickle cell anemia or some trait of it and one child who has weekly fainting spells."

At a July 30, 1998 meeting of the Wisconsin Legislature's Joint Committee for Review of Administrative Rules, representatives of two MPCP schools described for legislators some of the services provided to students with special education needs. Excerpts from their testimony follow:

Lutheran Special School.²¹ "...Lutheran Special School [provides] the oldest parochial special education program...in Milwaukee....[It was started] 40 years ago by

parents...who wanted their mentally retarded children to have the same opportunity as their other children, to attend a religious school....[T]his program...continues to grow, as it strives to carry out its mission, '...to be an advocate and resource for students with specific educational needs; to empower them to recognize and utilize their God-given potential through programs and services for students, their families and teachers...'

"Lutheran Special School currently serves 28 elementary students who have been diagnosed as Learning Disabled, Cognitively Disabled, Emotionally Disturbed, Attention Deficit Hyperactive Disorder, as well as "gray area" students. These children attend either our elementary self-contained classroom or our elementary resource room. Eleven of these children are Choice eligible....[E]ight of them come from minority families.

"...[W]e have a Teacher Consultant/School Psychologist who worked in four Lutheran inner city schools in Milwaukee. She works with students who have learning difficulties, assessing their strengths and weaknesses, she provides intervention techniques, and she helps teachers with adaptations for these students so that they can get the special help they need and remain in a Lutheran school. Forty-five percent of the children in these Lutheran schools are...eligible for Choice.

"Lutheran Special School was also responsible for beginning the Special Needs Program at Milwaukee Lutheran High School. This program currently has two special ed teachers serving 28-30 special needs high school students, providing an alternative curriculum as well as beginning a school to work program and enabling these students to get the skills necessary to be successful in the work force.

I"...[W]e also provide, in conjunction with a local university, an annual...in service for teachers of all denominations...[This provides] teachers with the skills necessary to work with students who have difficulty learning, allowing these students to remain in a parochial school. And, we have been involved with a local parochial university in helping them to begin a DPI approved special education minor, enabling graduates going into parochial schools to have the training and the degree to work with special education students..."

Pius XI High School.²² "Pius was founded in 1929 as a comprehensive high school with a mission to serve all students. In that context, Special Studies students are a viable part of the student body...[Pius] is staffed by two specialists in reading, one in math and two in learning disabilities. Currently, 52 students are enrolled in Math Improvement, 114 in Reading Improvement, and approximately 50 students are in the Learning Disabilities Program. Programs in Special Studies focus on the uniqueness of each individual and attempt to help students reach their potential, especially in reading and math [including students] identified by an M team or psychological assessment as learning disabled.

"A significant feature of Special Studies is that all students are 100% mainstreamed into regular classes, as are students with physical disabilities, and given help in resource centers. In the learning disabilities area, help in the resource room provides diagnosis and remediation along with compensation for learning problems. If a student is determined to be learning disabled, the Special Studies Department helps the student and parents plan an academic program. On the average, half of the students in the program are college bound. Reading and Math Improvement Programs provide instruction in small groups or individually. Reading instruction is based on diagnostic-prescriptive methods using a variety of materials so that each student's unique reading needs can be met. Those students working on math improvement generally also are enrolled in regular math courses.

"All areas of special studies are individualized to indicate to students that they are important and can excel. This approach assesses students' current instructional level of learning,

utilizes specific intervention strategies to help them progress and provides additional academic and emotional support. As a result, this department helps students develop the foundation for higher levels of analysis and problem solving demanded in their regular course work. Recently, for example, a student enrolled in the program earned a score of 36 on the ACT test. Department members work very closely with subject area teachers to ensure that instruction is consistent and supportive.

"Each year, Pius also has a number of students with physical disabilities. Over the years, the student population has included those with visual and hearing limitations, dwarfism, leg braces, and spina bifida. If a student entering Pius has a physical disability, a meeting is held with the parents and appropriate school officials to determine how best to meet their special needs.

"On the average, approximately one hundred students are classified by Guidance as disabled as a result of a physical or learning disability. Subject teachers are always notified of students with special needs."

Special needs students — MPS schools

MPS' school directory says, "When children with special education needs select a school/program where their individual needs cannot be appropriately met [i.e., an "Inappropriate School Choice"], parents will be contacted by special education supervisors to discuss options at other schools...."

MPS has the final say, **not the parent**, in determining where a special needs student attends school, including whether the student may attend a school that does not have a program for them.

This is not so with MPCP schools, which, **as with MPS schools**, do not have programs for all special needs students. While an MPCP school may advise a parent that the school does not have a specific program, under state law the decision to attend the school is the parent's, not the school's.

Figures 2, 3, and 4 illustrate that no MPS elementary, middle, or high school accepts all students with special education needs.²³ In contrast, no private school may reject an MPCP-eligible student based on special needs.

Figure 2.MPS elementary schools accepting special needs students.

Figure 3.MPS middle schools accepting special needs students.

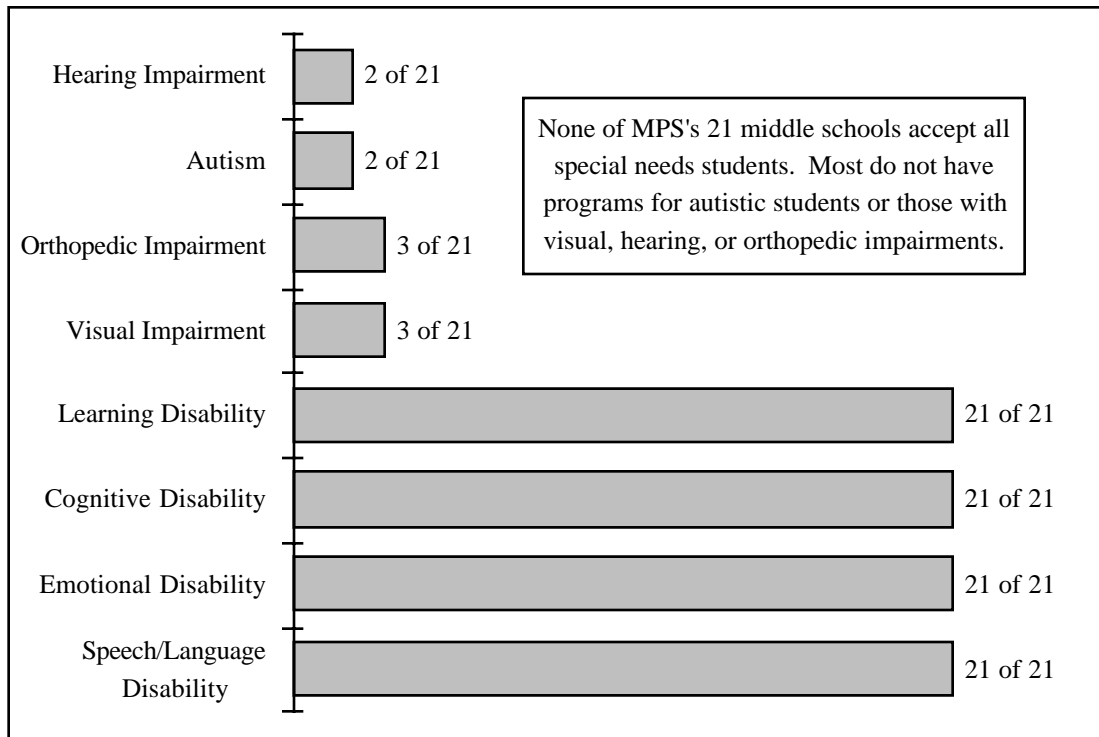

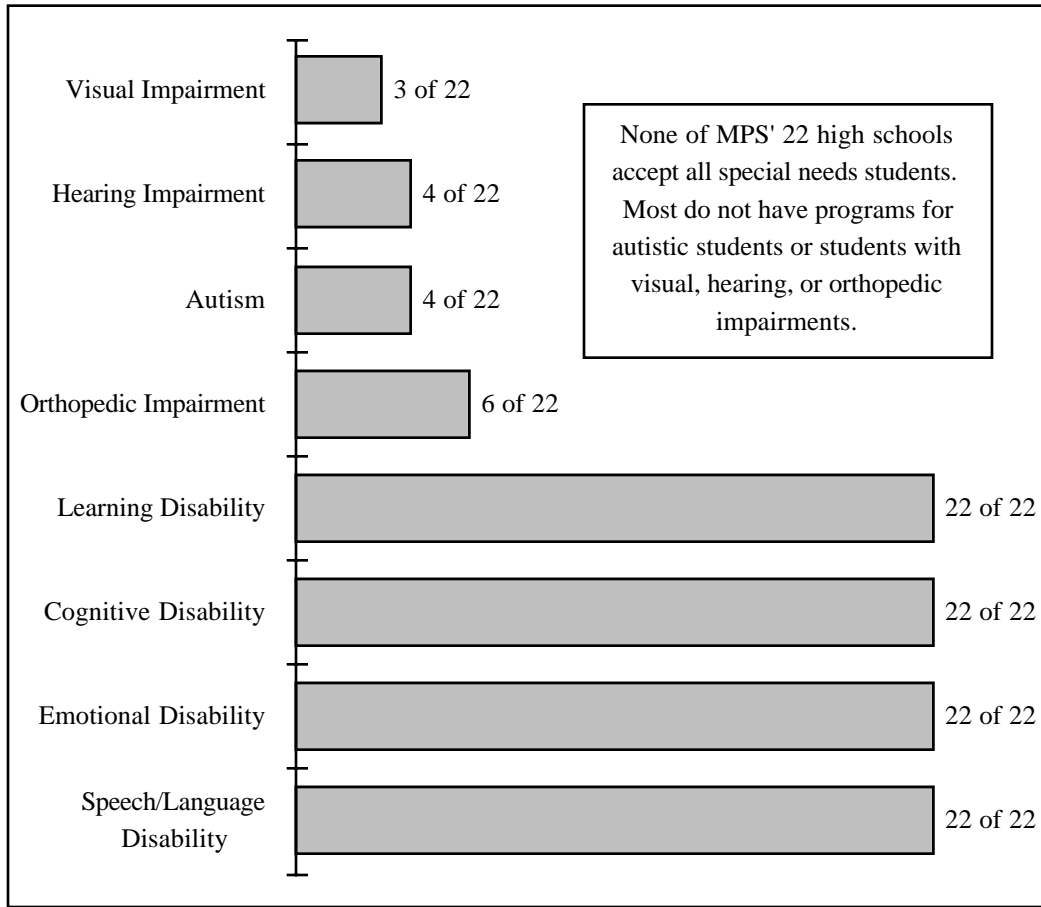

Figure 4.MPS high schools accepting special needs students.

Students with disciplinary or behavior problems

Previous sections described screening based on academic ability and special needs. Voucher opponents also claim that private schools rely on admission screening to exclude students with past disciplinary problems.

To reiterate the general point previously made, state law does not allow private schools to use screening criteria in reviewing MPCP-eligible student applications.

As with programs that screen for academic ability and special needs, MPS has an extensive program of alternative and partnership schools to which it may transfer students who are truants, adjudicated juveniles, or meet other criteria that define them, under state law, as "at risk" of not graduating.

Fifteen alternative programs are operated by MPS; another 32 are operated under contract to MPS by other entities, most of whom are private, non-profit organizations. The capacity of these alternative programs as of October, 1999, was 3,579 students, or more than 3% of the MPS enrollment. The majority of this capacity was in private organizations.²⁴

MPS is not alone among public schools in relying heavily on private schools to educate some of its most difficult students.²⁵ This again contrasts with frequent assertions that

public schools take all students and that private schools are selective in enrolling MPCP students. With specific respect to MPS, its former director of alternative programs said they enable "MPS to provide a whole range of different options. We want tailor-made programs for pregnant teens, chronic disrupters, or students coming from juvenile institutions. With contracting, we can offer those programs. In some cases [contract schools] are more effective than the traditional schools."²⁶

Conclusion

Milwaukee's experience with the nation's longest-running program of school vouchers directly contradicts the claims of voucher opponents regarding public and private school admission practices. It illustrates that a targeted, tax-supported school voucher program for low-income parents can be designed to provide essentially an open admission policy.

We did not evaluate allowable practices in other jurisdictions with tax-supported and, in some case, privately supported voucher programs. Such studies would be worthwhile.

We also did not evaluate the merits of (1) selective admission programs such we describe are used by MPS or (2) the prohibition in state law on use of selection criteria in reviewing MPCP applications. This is an issue worthy of analysis.

Endnotes

¹ Fuller is founder/director of The Institute for the Transformation of Learning (ITL), Marquette University. From 1991-95 he was superintendent of the Milwaukee Public Schools. Mitchell, owner of The Mitchell Company, is a consulting research associate at the Institute. All errors and interpretations are ours.

Sharon Schmeling, research associate at ITL, and Deborah Meyer, project assistant at The Mitchell Company, provided research. Donna Schmidt, Prince of Peace School; Brother Bob Smith, Messmer High School; Roger Laesch, former Superintendent of Lutheran Schools, Missouri Synod, Milwaukee; and Debra Dosemagen, Academic Vice Principal, Pius XI High School, provided information about special education students at their schools. Spence Korte, MPS Superintendent, and Aquine Jackson, Director, Division of Parent/Student Services, MPS, and staff at various MPS schools provided information regarding MPS admissions practices.

² Wisconsin Department of Public Instruction, "Milwaukee Parental School Choice Program Membership and Payment History, in Total, 1990 to Present," <http://www.dpi.state.wi>.

³ The MPCP statutes are found in Section 119.23, Wisconsin Statutes. Section.119.23(2) specifies (emphasis added) that "**any** pupil in grades kindergarten through 12" who meets MPCP eligibility standards "may attend, at no charge, any [MPCP-eligible] private school" in Milwaukee. The statutes give private schools two primary areas of discretion regarding MPCP participation: (1) they are not obligated to join the program; and (2) those that do may designate how many spaces are available. A lottery is held if there are more applicants than space available. Other eligibility criteria involve prior year school attendance.

⁴ "Private School Vouchers — Overview," <http://www.nea.org>.

⁵ "Vouchers and the Accountability Dilemma," <http://www.aft.org>.

⁶ Based on answers allegedly given by schools to anonymous phone callers hired by PFAW-NAACP to pose as parents. There has been no independent verification of these claims. The Wisconsin Department of Public Instruction states that it has no record of receiving an actual parent or student complaint regarding admission practices in the 10-year history of the MPCP.

⁷ The first quote from Rep. Sinicki is from the Fall, 1999 edition Rethinking Schools, a Milwaukee publication; the second quote is from comments Rep. Sinicki made November 17, 1999, at a public hearing at the Milwaukee Area Technical College.

⁸ "Through One City's Eyes — A Live Town Hall Meeting," September 9, 1999, WMVS-TV, Milwaukee Public Television. In the same broadcast, University of Wisconsin-Milwaukee Sociology Professor Gregory Squires said: "...[T]here's no reason to believe that [school choice] is going to somehow magically resolve these problems, in part for the reason that was just mentioned [by Tammy Johnson]...[T]he public schools have to take certain students the private schools don't have to take...For MPS students, a place will be found and that is not the case for all private schools. They don't all have to accept any student." The implication to some listeners of Squires' statement was that private schools in programs such as the MPCP will apply more selective admissions criteria than public schools. As this study demonstrates, in Milwaukee, that would not be the case for MPCP-eligible students.

⁹ We did not examine actual (v. allowable) admission practices at any MPS or MPCP school. As stated above, Note 5, the Wisconsin Department of Public Instruction states that it has received no actual parent or student complaint regarding admission practices in the 10-year history of the MPCP.

- 15 In 1989, George Mitchell summarized various earlier reports on widespread academic and family screening criteria by suburban public schools in considering the applications of minority students from MPS ("An Evaluation of State-Financed School Integration in Metropolitan Milwaukee, " June, 1989, by Wisconsin Policy Research Institute).

In a later report describing suburban screening of MPS transfer students, UW-Milwaukee Professor Harold Rose wrote: Suburban "...districts that identify themselves principally as college preparatory districts employ selection criteria that do not appear to be used by districts providing a comprehensive education. In some districts, results of specific performance instruments weigh heavily in the decision to approve admission as does an effort to increase the certainty that the range in abilities of transfer students does not deviate greatly from that of the resident population...[T]he practices with regard to admissions vary greatly across districts, with some [seeming; to select from a pool of [MPS] students who appear to differ least from resident students..." See "Milwaukee's City - Suburban Interdistrict Integration Program: A Review of the Student Application & Assignment Process," by Professor Harold Rose for the Compact for Educational Opportunity, January 1990.

- 16 Jane R. Henkel and Robert J. Conlin, Wisconsin Legislative Council staff, "Information Memorandum 97-3, New Law Relating to Interdistrict Public School Open Enrollment," October 15, 1997. Provisions of this new law are found in ss. 118.51 and 118.52, [Wisconsin Statutes](#).
- 17 MPS says the term special education needs applies to children with "hearing impairments, emotional disturbances, learning disabilities, orthopedic impairments, cognitive disabilities, speech and language disabilities, traumatic brain injuries, visual impairments, and other health impairments..." ("Directions," elementary and middle school edition, p. 6).

We do not in this paper discuss the rights, responsibilities, and tax-supported programs for special education students in public or private schools. Our purpose is confined to providing information about allowable practices in the context of claims by school choice opponents.
